

Kanavu illam

The Future of AI-Powered Architecture

Instant 3D Models, Vastu, Estimation, and Structural Reports — from any 2D floor plan.

Presented by **Kanavu illam** Team

Made with GAMMA

OUR SOLUTION

Introducing Kanavu illam

A one-stop Flutter mobile app that acts as your **intelligent virtual architect** — bringing premium architectural services directly to your phone at a fraction of the traditional cost.

Instant Conversion

Upload any 2D floor plan (JPG/PNG) and get an AI-generated 3D view in seconds.

Comprehensive Reports

Auto-generates Vastu analysis, structural plans, elevations, and accurate cost estimates.

Affordable & Accessible

Premium architectural intelligence — now available to every homeowner and contractor.

FEATURES

Key Features & Offerings

3D View Generation

Realistic 3D visualizations generated directly from basic 2D floor plans.

Vastu Analysis

Direction-based Vastu compliance checks with actionable recommendations.

Cost Estimation

Itemized Bill of Quantities (BOQ) with accurate, market-rate pricing.

Structural Plan

AI-calculated foundation mapping and load-bearing structural insights.

Building Elevation

Beautiful exterior elevation designs tailored to G or G+1 floor plans.

HOW IT WORKS

The User Journey: 5 Simple Steps

Upload Plan

Select floor count and upload 2D plan images

Select Services

Choose modules: 3D, Vastu, Estimation, etc.

Secure Payment

Complete transaction via payment gateway

AI Processing

Backend pipeline extracts architectural data

View & Download

Instantly view results and download PDF report

From upload to professional report in under a minute — no architectural expertise required.

Made with GAMMA

USER EXPERIENCE

Seamless Experience & Smart Dashboard

Intuitive Dashboard

Clean, professional UI with easy navigation across all modules.

User Profile & Analytics

Track total projects generated and total spend at a glance.

Project History

Dedicated history screen with dynamic badges for purchased reports.

1-Click PDF Export

Download a highly formatted, client-ready PDF document instantly.

Made with GAMMA

LIVE DEMO

See Kanavu illam in Action

Watch the complete workflow — from upload to professional PDF — in under 2 minutes.

01

Explore Dashboard & Profile

Overview of user analytics, project count, and navigation.

02

Upload a Sample 2D Floor Plan

Live upload of a JPG/PNG plan with floor selection.

03

Select Modules & Simulate Payment

Choose 3D, Vastu, Estimation — and complete checkout.

04

View AI-Generated Outputs

3D model, Vastu report, and cost estimation — all rendered live.

05

Check History & Download PDF

Access past projects and export a formatted, client-ready report.

THE CHALLENGE

Problems in the Existing System

□ Time-Consuming

Converting a 2D plan to a 3D model takes days or weeks — not minutes.

💸 High Costs

Hiring architects for basic estimates, Vastu checks, and 3D modeling is expensive for middle-class clients.

□ No Instant Visualization

Customers struggle to imagine their future home from a flat 2D line drawing.

⚠□ Manual Errors

Human errors in cost estimation and structural calculations lead to costly budget overruns.

Made with GAMMA

LIVE DEMONSTRATION

Live Application Demonstration

01

Dashboard & Profile

Explore the dashboard and profile experience.

02

Upload Floor Plan

Upload a sample 2D floor plan to begin the workflow.

03

Select Modules

Choose modules and simulate the payment process.

04

Generate Results

Review the AI-generated 3D model, Vastu insights, and estimation.

05

History & PDF

Check the history screen and download the final PDF.

Thank You!

We are redefining how people design their dream homes.

Kanavu Illam makes professional architecture **instant, affordable, and accessible** to every Indian homeowner, contractor, and builder.
